Barcelona, October 12th, 2014

Hereby we inform that the reference Pouring System 9762-X and 9932-X highly suitable for the production of rigid foams with applied density of 40 – 50 Kg/m³, specially indicated for insulation and filling of all type of cavities as tanks, deposits, cool stores, panels, ship tanks, etc. and doesn't react with NAFT and MAZOUT, and it is also chemically resistant against NAFT and MAZOUT in direct contact.

And as evidence thereof,

The image shows a blue ink stamp of Synthesia Internacional S.L.U. with a handwritten signature in purple ink over it. The stamp contains the company name and address: Argent 3, Area Ind. del Llagost, Castellbisbal, 08755 - Barcelona, Spain.

Manuel Vicente Delgado
Deputy Director
Synthesia Internacional, S.L.U
